

## Instant Replay, at your fingertips -

### Introducing NStantReplay

In live sports, every millisecond counts. NStantReplay delivers high-speed, hardware-powered instant replay with unmatched responsiveness—giving you the tools to capture, cue, and replay critical moments with precision and control.

Powered by the trusted NFinity Video Server hardware, NStantReplay is more than software—it's a dedicated live production solution. From switching camera angles mid-recording to frame-accurate scrubbing, it delivers the speed, power, and simplicity live environments demand.

### What Sets NStantReplay Apart -

NStantReplay runs in a true live mode, making it ideal for fast-paced sports and events. As a stand-alone system, it offers a powerful, cost-effective alternative to traditional replay gear.

NStantReplay is purpose-built for real-time clip capture, shuttle control, and instant on-air play-back—all through an intuitive interface that feels natural under pressure. From community sports to professional broadcasts, it delivers seamless, broadcast-grade replays without the need for extra gear or complex configuration.

### Key capabilities include:

- Multi-camera support for switching angles—even during live recording.
- Advanced replay modes including real-time playback, slow motion, and highlight stacking.
- Integrated jog and shuttle controls, or supported external panels for responsive slow-motion and frame-accurate scrubbing.
- Streamlined interface, featuring thumbnail timelines and instant double-click cue access.

With multi-port recording, SDI video and audio output, and built-in timecode management, NStantReplay keeps your content ready to roll without interrupting the action.

**Capture. Cue. Command.**

### Features:

- **Multi-Angle Slo-Mo Playback**  
Instantly replay key moments from multiple camera angles in fluid slow motion.
- **One-Button Activation**  
Single-button control triggers the replay sequence, even mid-broadcast.
- **Fast-Turnaround Clip Export**  
Capture, tag, and export replay clips for social media in seconds.
- **External Controller Support**  
Seamless integration with compatible jog/shuttle panels for tactile replay control.

### Benefits:

- **Elevates Viewer Engagement**  
Keeps audiences locked in with thrilling real-time replays.
- **Maximizes Production Value**  
Delivers professional-grade results—without overcomplicated gear.
- **Accelerates Social Sharing Push**  
highlight clips to your platforms while the game is still hot.
- **Simplifies Your Workflow** Enables lean crews to deliver high-impact replays quickly and easily.
- **Boosts Sponsor Visibility**  
Enhances replay branding opportunities with precision cueing.
